

Up Your Megawatts!

COAL UNITS ARE
WORKING HARD AGAIN.
MAKE IT COUNT!

e es

| CoalTreat®

EES' CoalTreat™ fuel additive uses advanced chemistry to reduce boiler slagging, improve heat rate, and restore capacity, optimizing efficiency in coal-fired units - without major capital expense.

CoalTreat™ Use Case – 750 MW Unit

- +3% generation increase
- 2.5% heat-rate improvement
- \$2.5M annual net revenue gain
- Rapid deployment: no major retrofits
- 150–200° F higher ash fusion temperatures
- Rate-case pass-through eligible
